

AD 2 AERODROMES**RJFF AD 2.1 AERODROME LOCATION INDICATOR AND NAME****RJFF - FUKUOKA****RJFF AD 2.2 AERODROME GEOGRAPHICAL AND ADMINISTRATIVE DATA**

1	ARP coordinates and site at AD	333504N/1302706E 151°/1.59km from RWY 16L THR
2	Direction and distance from (city)	1.6nm E Hakata railway station.
3	Elevation/ Reference temperature	30FT / 32°C (2012-2016)
4	Geoid undulation at AD ELEV PSN	107FT
5	MAG VAR/ Annual change	8°W (2025) / 3'W
6	AD Administration, address, telephone, telefax, telex, AFS, e-mail and/or Web-site addresses	Fukuoka International Airport Co., Ltd. 782-1 Shimousui, Hakata-ku, Fukuoka, Japan Tel : 092(623)2255 (OPS)
7	Types of traffic permitted(IFR/VFR)	IFR/VFR
8	Remarks	Fukuoka Airport Office (Civil Aviation Bureau) 2025-3 Sasai, Hakata-ku, Fukuoka, Japan Tel : 092(621)2221 (2330-0815UTC MON THRU FRI)

RJFF AD 2.3 OPERATIONAL HOURS

1	AD Administration	H24 (See AIP RJFF AD2.20)
2	Customs and immigration	Customs: 2200-1300 Immigration: 2130-1300
3	Health and sanitation	2200-1300
4	AIS Briefing Office	Nil
5	ATS Reporting Office(ARO)	Nil
6	MET Briefing Office	H24
7	ATS	H24
8	Fuelling	2000 - 1400
9	Handling	2100 - 1400
10	Security	2100 - 1300
11	De-icing	Nil
12	Remarks	Nil

RJFF AD 2.4 HANDLING SERVICES AND FACILITIES

1	Cargo-handling facilities	All the modern institutions that deal with the weight thing to a Boeing747 type freighter.
2	Fuel/ oil types	Fuel grade : JET A-1 Oil Grades : Turbin grades
3	Fuelling facilities/ capacity	Hydrant refueling and fuel truck / No limitation.
4	De-icing facilities	Nil
5	Hangar space for visiting aircraft	Nil
6	Repair facilities for visiting aircraft	Nil
7	Remarks	Fuel/Oil service : PN

RJFF AD 2.5 PASSENGER FACILITIES

1	Hotels	Hotels in the city
2	Restaurants	At airport
3	Transportation	Bus, taxi and subway
4	Medical facilities	At airport and hospitals in the city
5	Bank and Post Office	At airport
6	Tourist Office	At airport
7	Remarks	Nil

RJFF AD 2.6 RESCUE AND FIRE FIGHTING SERVICES

1	AD category for fire fighting	CAT 9
2	Rescue equipment	Chemical fire fighting truck x 3, Water-supply truck, Rescue and lighting power supply truck, Emergency medical equipments conveyance truck
3	Capability for removal of disabled aircraft	Ask AD administration
4	Remarks	Nil

RJFF AD 2.7 SEASONAL AVAILABILITY-CLEARING

1	Types of clearing equipment	Snow removal equipment : (1) 4 Motor graders (2) 1 Wheel loader
2	Clearance priorities	(1) RWY(16L/34R), TWY(A, B, E2, E5(RWY34R in use), E9(RWY16L in use), E12, E13, K1, K3, K7, C1, W1, C9 and Y) (2) EAST APRON(From SPOT NR 1 to SPOT NR 12) and WEST APRON(From SPOT NR 50 to SPOT NR 58)
3	Remarks	Seasonal availability : All seasons TWY/APN to measure the coefficient of friction : TWY(A, B, E1-E3, E5, E9, E12, E13, K1, K3, K7, C1, W1, C3, W3, C6, W8, C9 and Y)

RJFF AD 2.8 APRONS, TAXIWAYS AND CHECK LOCATIONS DATA

1	Apron surface and strength	Surface : Concrete Strength : PCR 1132/R/B/W/T SPOT NR 1, 1L, 1R, 2, 3, 4, 5, 6, 6L, 6R, 7, 8, 9, 10, 11, 11L, 11R, 12, 12L, 12R, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 32L, 32R, 47, 48, 48L, 48R, 49, 49L, 49R, 50, 50L, 50R, 51, 51L, 51R, 52, 52L, 52R, 53, 54, 55, 56, 57, 58, 59
2	Taxiway width, surface and strength	Surface : Asphalt concrete and concrete Strength : PCR 1221/F/B/X/T : A, K1, K2, K3, K4, K5, K6, K7, Y, E1, E2, E3, E4, E5, E6, E7, E8, E9, E10, E11, E12, E13, C1, C2, C3, C4, C5, C6, C7, C8, C9, W1, W2, W3, W4, W5, W6, W7, W8, W9, W10, B, L Width : 83M : U 51M : K7 50M : K4, K5 49M : K1, K2, K3, K6 44M : W2, W3, W4, W5, W6, W7, W8, W9 35.6M : W10 34M : E4, E7, E10, C2, C5, C8 33.3M : W1 32M : E2 30M : E1, E3, E5, E6, E8, E9, C3, C4, C6, C7 28.5M : E11, E12, E13, C1, C9 24M : L 23M : A, B, Y, J1, J2, J3, J4, J5

RJFF AD 2.9 SURFACE MOVEMENT GUIDANCE AND CONTROL SYSTEM AND MARKINGS

1	Use of aircraft stand ID signs, TWY guide lines and Visual docking / parking guidance system of aircraft stands	ACFT stand ID sign : NR1, NR2 - 5, NR6, NR7 - 10, NR11, NR12, NR51, NR52, NR53 - 58 ACFT stand taxi lane : L, U Visual docking guidance system : NR1, NR2 - 5, NR6, NR7 - 10, NR11, NR12 (See attachment)
2	RWY and TWY markings and LGT	<p>RWY:16L/34R, 16R/34L (Marking): RWY designation, RWY CL, TDZ, Aiming point, RWY THR, RWY side stripe, RWY middle point (LGT): REDL, RCLL, RTHL, RENL, RTZL(RWY16L/34R), WBAR(RWY16L/34R), RWY DIST marker(RWY16L/34R), Takeoff Hold Lights (RWY status LGT) (RWY16L/34R, see attached chart)</p> <p>TWY: ALL TWY (Marking): TWY CL, TWY side stripe (LGT): TWY edge LGT (EXC K1 - K7, Y, U)</p> <p>TWY: E1 - E13, C1 - C9, W1 - W10 (Marking): RWY HLDG PSN, Mandatory instruction (LGT): RWY guard LGT</p> <p>TWY: A, E1 - E5, B, K1 - K7, Y (Marking): SFC painted direction sign (see attached chart)</p> <p>TWY: B(BTN W9 AND C9) (Marking): SFC painted location sign (see attached chart)</p> <p>TWY: A(BTN E10 AND E11) (Marking): GP HOLD LINE</p> <p>TWY: B(BTN W10 AND C9) (Marking): APPROACH/DEPARTURE HOLD LINE</p> <p>TWY: E1 - E13, C1 - C9, W1 - W10, A, B, K1 - K7, Y (LGT): TWY CL LGT</p> <p>TWY: E1 - E13, C1 - C9, W1 - W10, A, B (LGT): Taxiing guidance sign</p> <p>TWY: E1 - E5, E7, E10 - E13, C1, C2, C5, C8, C9 (LGT): Runway Entrance Lights(RWY status LGT) (see attached chart)</p>
3	Stop bars	Nil
4	Remarks	(LGT): Apron flood LGT (Marking): Over run area

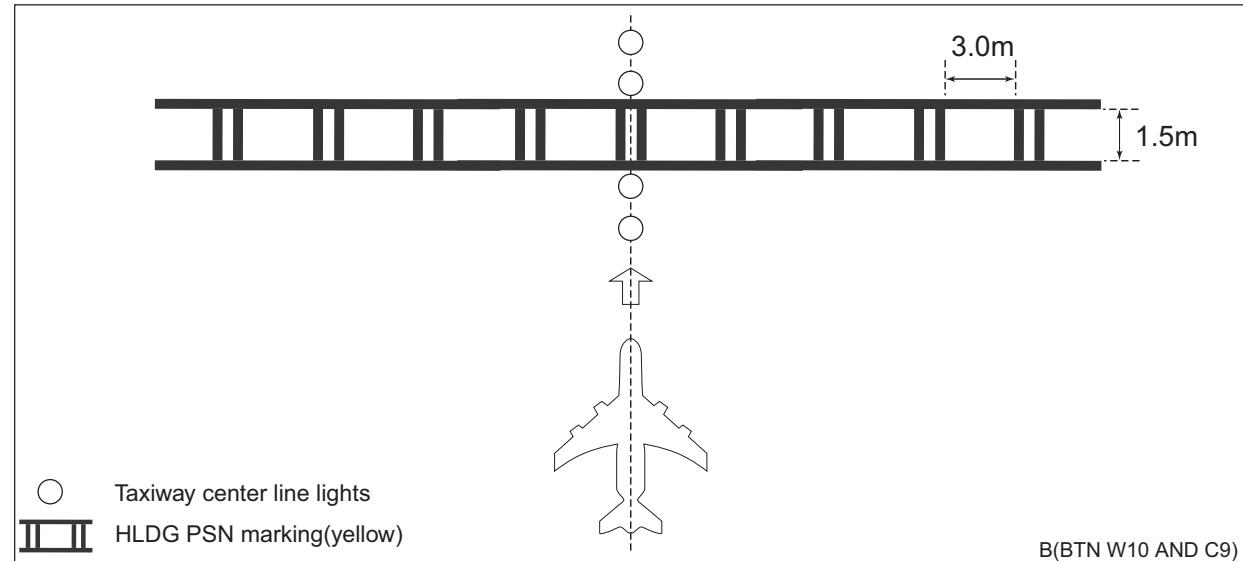

GP HOLD LINE

The "GP HOLD LINE" is installed on TWY A (BTN E10 AND E11), consists of HLDG PSN marking.
(see below figure, and AD2.24-ADC-1 AD CHART) REF AD2.20.2.1 1) for taxiing procedure on the "GP HOLD LINE".

APPROACH / DEPARTURE HOLD LINE

The "APPROACH / DEPARTURE HOLD LINE" is installed on TWY B (BTN W10 AND C9), consists of HLDG PSN marking.
(see below figure, and AD2.24-ADC-1 AD CHART) REF AD1.1.6.13

Runway Entrance Lights (REL) and Takeoff Hold Lights (THL)

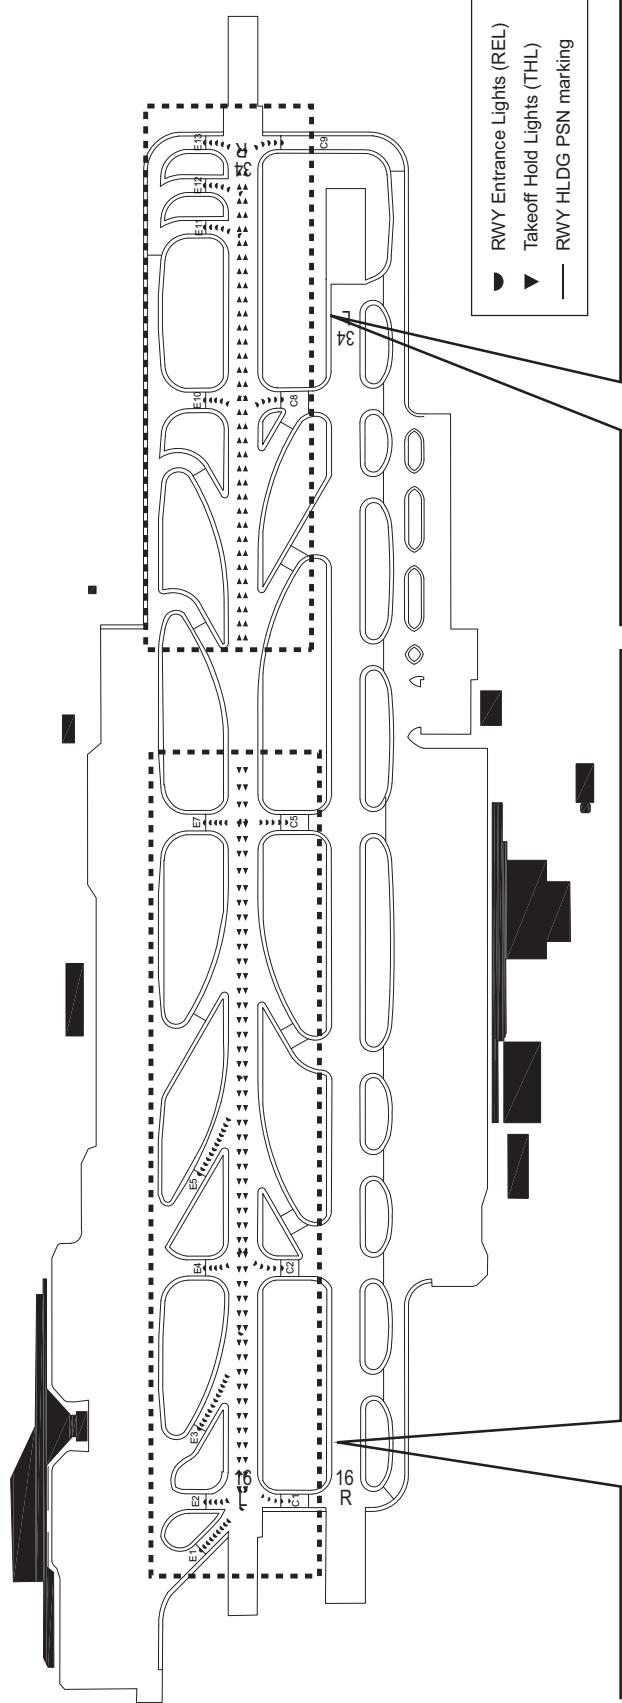

Figure 1

NOTE: The TWY names and RWY HLDG PSN markings in this ATTACHMENT are depicted only for the TWYs where REL are installed.

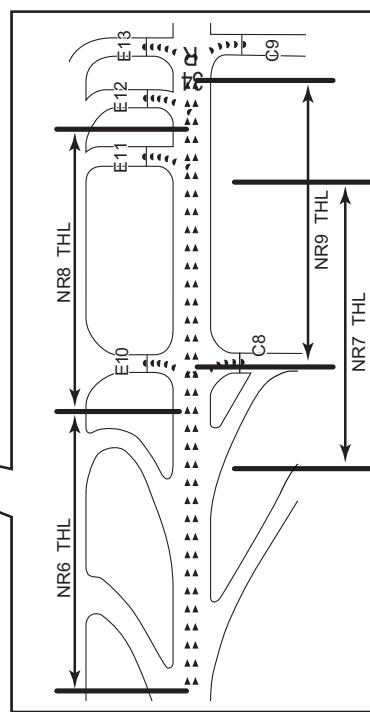

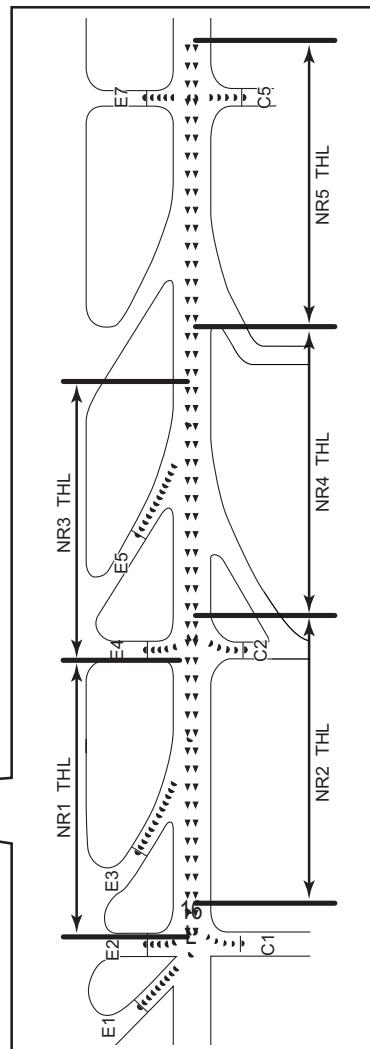

Figure 2

Surface Painted Direction Sign and Surface Painted Location Sign

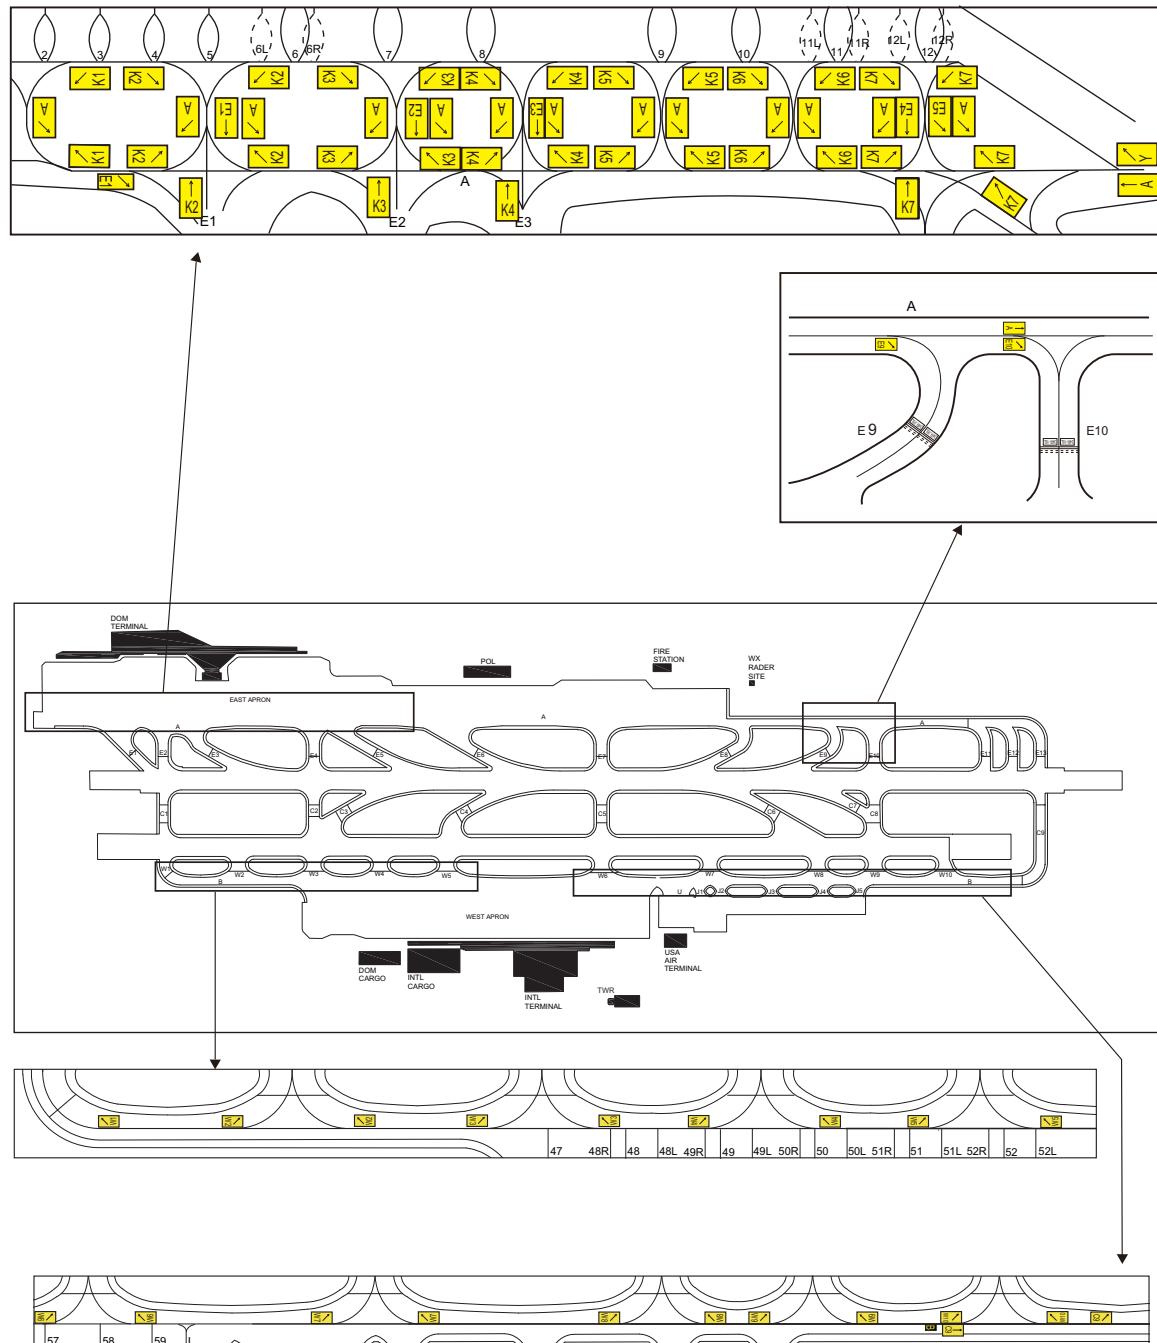

Type of Surface Markings

(1) Surface Painted Direction Sign

This type of marking at a taxiway intersection indicates the designation and direction of taxiway leading out of an intersection. Black inscriptions with an arrow with a yellow background.

(2) Surface Painted Location Sign

This type of marking indicates the designation of the taxiway on which the aircraft is located. Yellow inscriptions with a black background and a yellow frame.

VISUAL DOCKING GUIDANCE SYSTEM

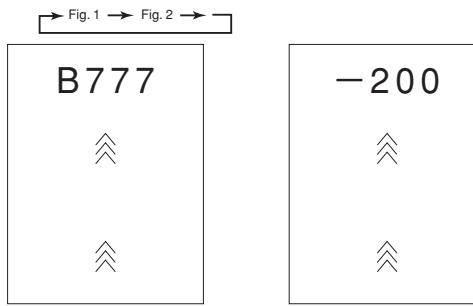

1. General

- (1) Aircraft parking stands NR1, NR2 - 5, NR6, NR7 - 10, NR11, NR12 are equipped with a visual docking guidance system. The pilots of an arriving aircraft assigned to park at one of these parking stands can use this system to be guided and stop the aircraft at the correct parking position.
- (2) This system is operational only in the automatic mode and in an event of a system failure, the aircraft shall be manually guided by a marshaller to the stopping position.
- (3) The visual docking guidance system consists of a display screen for pilots and a laser scanner. The system detects and analyses the aircraft type of an approaching aircraft, tracks it through the laser scanner, and displays these results on the display screen.
- (4) The display screen indicates the following information:
 - a) type of the approaching aircraft
 - b) deviation from the lead-in center line
 - c) distance to the stopping position

The above information is provided equally to the pilots on both left seat and right seat.

2. Aircraft Type Indication

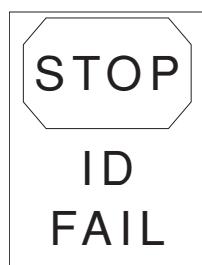

- (1) An operator on ground shall input the aircraft type into the system before the aircraft approaches the parking stand. Upon accepting the input, the system carries out internal calibration, starts the laser scanner simultaneously, and indicates the aircraft type according to the input. The system then will begin to indicate yellow lead-in arrows scrolling upwards prompting the aircraft to proceed. (Fig.1, Fig.2)

- (2) When the laser scanner detects the approaching aircraft, the display screen will indicate the aircraft type, a "T" bar, and a lead-in upward arrow in yellow.
- (3) At least until the approaching aircraft arrives at a point 15 meters before the stopping position, the system will identify the aircraft type and will compare with the previously input aircraft type. If these data match, the system will continue its operation. If they do not match, the display screen will indicate "STOP" with a red border, and "ID FAIL" simultaneously. (Fig.3)

NOTE: At this moment, the pilots must stop the aircraft immediately.

When the operator re-input the correct aircraft type into the system and the system finds it correct, it resumes normal operations indicating the correct aircraft type on its display screen.

3. Taxiing and Lateral Center line Guidance

- (1) While taxiing the aircraft using the system, the pilots should maneuver the aircraft at a low speed to the stopping position. In an event when "SLOW" is indicated on the display screen, the pilots should further decelerate the taxiing speed to avoid overshooting. (Fig.4)

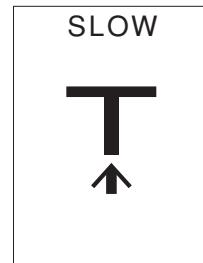

Fig. 4

- (2) Deviation of an upward yellow arrow from the center line of "T" indicates the deviation of the approaching aircraft relative to the center line of the parking stand either to right or left. Further, an additional flashing red arrow on the either side indicates the required direction for the aircraft to turn(Fig.5, Fig.6) and indicate numerical value of remaining distance. (Fig.7, Fig.8)

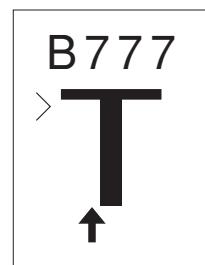

Fig. 5

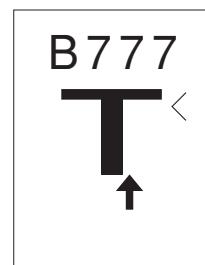

Fig. 6

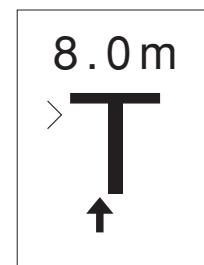

Fig. 7

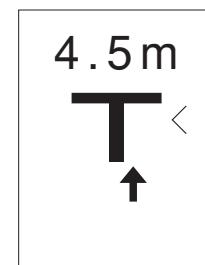

Fig. 8

4. Stop Guidance

- (1) When the approaching aircraft is within 20 meters from the stopping position, the shaft of the illuminated "T" will start to reduce in its length from the bottom to indicate the approaching rate of the aircraft, indicating the remaining distance to the stopping position successively. (Fig.9, Fig.10) As the aircraft approaches the stopping position, the shaft of the illuminated "T" retract one row for every 0.3 m.

At aircraft parking stands when the approaching aircraft is within 30 meters from the stopping position, display of digital countdown will start.

As the aircraft approaches the stopping position, a digital countdown shows the distance to stop position numerically, for every 1.0 meters (from 30 to 5 meters to the stop position), for every 0.5 meters (from 5 to 2 meters to the stop position) or for every 0.1 meters (from 2 to 0 meters to the stop position).

When the approaching aircraft is within 20 meter from the stopping position, the shaft of the illuminated "T" will start to reduce in its length from the bottom to indicate the approaching rate of the aircraft, indicating the remaining distance to the stopping position successively. (Fig.11, Fig.12)

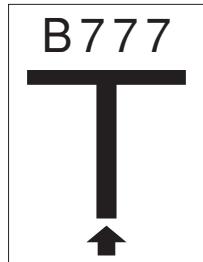

Fig. 9

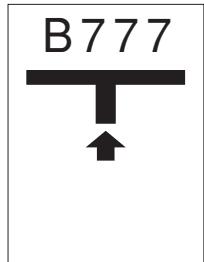

Fig. 10

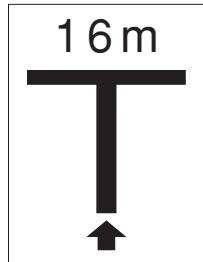

Fig. 11

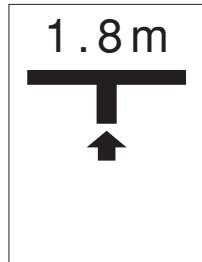

Fig. 12

- (2) When the aircraft reaches the stopping position, a message "STOP" will be displayed on the screen with a red border. (Fig.13)

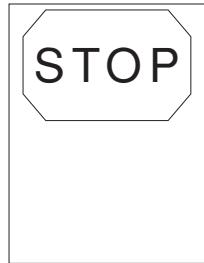

Fig. 13

- (3) When the aircraft is stopped at the correct stopping position, a message "OK" will be displayed on the screen in several seconds. (Fig.14)

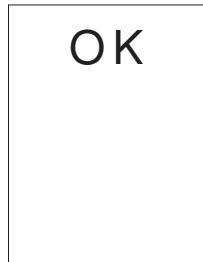

Fig. 14

Fig. 15

- (4) When the operator applies chocks, and switches on "CHOCK ON" switch, the display screen will display "CHOCK ON." (Fig.15)

- (5) If the aircraft stops at a position beyond the correct stopping position, a message "TOO FAR" will be displayed on the screen. (Fig.16)

Fig. 16

5. Cautions and Safety

- (1) When the system displays an incorrect aircraft type, or when such a message as "STOP", "ID FAIL", or "WAIT" appears on the display screen, the pilots should stop the aircraft immediately. (Fig.3, Fig.13, Fig.17)

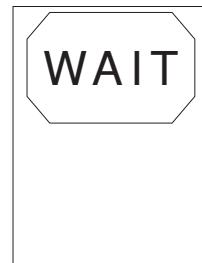

Fig. 17

- (2) During heavy fog, rain or snow the visibility for the docking system can be reduced. When the system is activated and in capture mode, the display will deactivate the floating arrows and show "SLOW" (Fig.18). The message will be superseded by the closing rate bar as soon as the system detects the approaching aircraft. The pilot must not proceed beyond the bridge, unless the "SLOW" text has been superseded by the closing rate bar.

LOC unusable in the following areas : beyond 015° W side of LOC course.
beyond 015° E side of LOC course.

RJFF AD 2.20 LOCAL TRAFFIC REGULATIONS

1. Airport regulations

1.1 Noise restrictions

Time restrictions on departure and arrivals:

No take off or landing shall be permitted during the hours from 1300 UTC to 2200 UTC with the exception of aircraft in an emergency or in an unavoidable situation.

Note: "In an emergency or in an unavoidable situation" as described above shall be limited to the following cases:

- (1) Aircraft declared emergency or is under emergency situation
- (2) Aircraft operating for the purpose of emergency mission e.g. lifesaving and organ transport
- (3) Aircraft operating for the purpose of emergency mission by Public institution
- (4) Aircraft operating for the purpose of urgent news collection activities
- (5) When take-off or landing is considered really unavoidable due to rapid weather change, air traffic congestion or other reasons
- (6) Aircraft operating with the reasons which Fukuoka International Airport Co., Ltd. approves especially

1.2 ATC Procedure

1) ATC clearance

ATC clearance will be obtained by "Voice radiotelephone (Voice RTF)" or "Departure Clearance by data link (DCL)".

Shown in detail below (a) or (b).

CLEARANCE FLOW	(a) Voice RTF	(b) DCL
REQUEST CLEARANCE	Call Fukuoka Delivery (121.925) at 5 minutes before starting engines, with the following information. (1) Call sign (2) Destination (3) Proposal flight level/altitude (alternative flight level/altitude, if any.) (4) Parking position (spot number)	Refer to ENR 1.5.4.1 (Operation for Departure Clearance by data link (DCL)) - Send RCD message at 15 minutes before starting engines. - Monitor Fukuoka Delivery (121.925). NOTE: - Start monitoring Fukuoka Delivery (121.925) once RCD message is sent. In case coordination is required, Fukuoka Delivery calls the pilot on Voice RTF.
OTHERS	Aircraft from West apron should notify Fukuoka Delivery via Voice RTF of their request for either RWY16L or RWY34R for departure. When requesting ATC clearance through DCL, pilots must notify Fukuoka Delivery of their runway request (RWY16L/34R) via Voice RTF prior to sending RCD. After receiving clearance from Fukuoka Delivery, monitor Fukuoka Ground (121.7 for East apron, 121.8 for West apron unless otherwise requested by ATC). Call Fukuoka Ground when ready for push back/for taxiing.	

2) Intersection departure

- a) Separation for departure as in AD1.1.6.3.2.2(2)(2) will not be applied to aircraft departing from;
 - (1) TWY E-12 or TWY E-11 behind departing aircraft from E-12.
 - (2) TWY W-10 behind departing aircraft from E-11.
- b) Aircraft requiring separation in AD1.1.6.3.2.2(2)(2) shall advise "FUKUOKA GROUND/TOWER" accordingly.
- c) Departing aircraft may be instructed intersection departure from TWY E-11 or E-12 without Pilot's consent. Aircraft unable to depart from TWY E-11 or E-12 shall advise "FUKUOKA GROUND/TOWER" accordingly.

3) Prior notice of landing RWY

All arriving aircraft should notify FUKUOKA TOWER of the landing RWY at initial contact to avoid approaching the wrong RWY.

4) VFR arriving and crossing aircraft

FUKUOKA Tower may instruct VFR arriving and crossing aircraft to change frequency from 118.4MHz to 118.25MHz.

1.3 RWY relations

1) RWY16L/34R

- a) Departing aircraft from East apron will use RWY16L/34R in principle unless otherwise required by ATC.
- b) Arriving aircraft will use RWY16L/34R in principle unless otherwise required by ATC.
 - (1) In order to avoid misunderstanding of the landing RWY, PALS for RWY16L or 34R will be turned on even during daytime and in VMC.
 - (2) In case the landing RWY is specified as RWY16L or 34R, RWYIL and PAPI for RWY16R or 34L will normally be turned off.
- 2) RWY16R/34L will be specified for departing aircraft from West apron in principle unless otherwise required by ATC. However, if a departing aircraft from West apron requires a departure from RWY16L/34R for performance reasons, the pilot shall notify Fukuoka delivery.
- 3) RWY16L/R will be preferentially used when tail wind component is 10kt or less.
- 4) RWY16L/R: RNP or LOC approach is primarily applied.
- 5) RWY34L/R: a) Visual approach is primarily applied.
 b) RNP or LOC approach is applied when visual approach is not applicable.

Remarks : RWY relations described above will be applied when radar service provided by Fukuoka approach/radar.

1.4 小型航空機の空港利用

(1) 福岡空港における運航の安全の確保及び円滑な空港運用の維持の観点から、混雑時間帯（日本時間午前9時から午後7時まで）において、以下の要件等を満たさない小型航空機（回転翼航空機を除く）については、福岡空港における離着陸のための施設利用を認めない。

- 1) ATC トランスポンダー並びに ILS、VOR/DME 及び ADF 受信装置を装備していること。
- 2) 飛行方式は計器飛行方式によること。
- 3) 機長が福岡空港の出発進入方式を含む管制方式を熟知していること。
- 4) 以下の飛行が可能であること。
 - (a) 高度 10,000 フィートにおいて、250 ノットの速度を保持することが可能であること。
 - (b) 高度 10,000 フィートから 5,000 フィートまで降下するにあたっては、200 ノットから 250 ノットまでの間で一定の速度を保持することが可能であること。

以下の小型航空機（回転翼航空機を除く）については、本取扱いを適用しないこととする。

- 1) 急患、臓器等の輸送、災害派遣等緊急を要する小型航空機
- 2) 国、地方公共団体その他の公的機関の使用に係る小型航空機
- 3) 新聞社その他の報道機関の取材のための使用に係る小型航空機
- 4) その他福岡空港事務所長が認める小型航空機

(2) 回転翼航空機については、空港管理者が認める場合を除き、福岡空港における離着陸のための施設利用を認めない。福岡空港（奈多地区）「奈多ヘリポート」の施設利用についてはヘリポート管理者に連絡すること。（参照：AIP AD3 RJFH）

1.5 PDA (parts departing aircraft) reporting to Airport Administration

In order to secure the safety of aircraft operations and to rectify the issue of falling objects from aircraft operating in the vicinity of Fukuoka Airport, aircraft operators are required to notify Airport Administration (Tel 092-623-2255 (OPS)) of any "Parts Departing Aircraft" from flights operating to/from Fukuoka Airport, without delay. This information shall be shared by relevant parties in order to prevent recurrence of such.

1.6 Other information

- 1) On use of this airport by transient ACFT, the operator is required to obtain the prior permission of the airport administrator in order to adjust parking area.
- 2) When RWY, TWY and other facilities will be closed due to scheduled maintenance (see NOTAM RJFF), aircraft using this airport should obtain the prior permission of the airport administrator until 2 hour before take off or landing.(TEL 092-623-2255 (OPS))
- 3) Restrictions about the use of auxiliary power units (APU)
When an aircraft is using an aircraft parking stand with fixed power facilities, APU shall not be used outside the time periods specified below except when specifically acknowledged by the authority as necessary.
 - a) Less than 30 minutes prior to the estimated time of departure.
 - b) The minimum time required for switching over to the fixed power facilities, after arrival at the parking stand.
 - c) For the minimum time required for aircraft maintenance purposes if needed.

NOTE:

Spot 1 - 12 and 53 - 58 are aircraft parking stands with fixed power facilities.

1.4 On use of Fukuoka airport for small aircraft

(1) In order to cope with the increasing flight frequencies and to ensure the safety of flight, during the hours from 0000UTC to 1000UTC, small aircraft flights* shall be prohibited from take-off and landing at Fukuoka airport unless they meet the following requirements.

*except HEL.

- 1) ATC transponder, ILS, VOR/DME and ADF equipped.
 - 2) Operation in accordance with IFR.
 - 3) Aircraft crew shall be familiar with ATC procedures at Fukuoka airport.
 - 4) According to the instructions of ATC, they can keep.
 - (a) Maintaining 250kts at 10,000ft.
-
- (b) Maintaining between 200kts and 250kts during the descent from 10,000ft to 5,000ft.

NOTE. Small aircraft* in the following situations are exempted from applying any of the above-mentioned limitations.

*except HEL.

- 1) Aircraft operation for the transportation of urgent patients or internal organs and disaster dispatches etc (in a state of emergency).
- 2) Aircraft operation for the purpose of Government Agency and Local Government activities.
- 3) Aircraft operation for the purpose of news gathering activities by newspaper companies etc (such as media organizations).
- 4) Small aircraft permitted by Director of Fukuoka Airport Office (CAB).

- (2) Take-off and landing of Helicopters shall not be permitted at Fukuoka airport except those permitted by Fukuoka airport administrator.
Helicopter operators are requested to contact NATA HELIPORT (FUKUOKA AIRPORT NATA AREA) administrator for the use of NATA HELIPORT (See AIP AD3 RJFH).

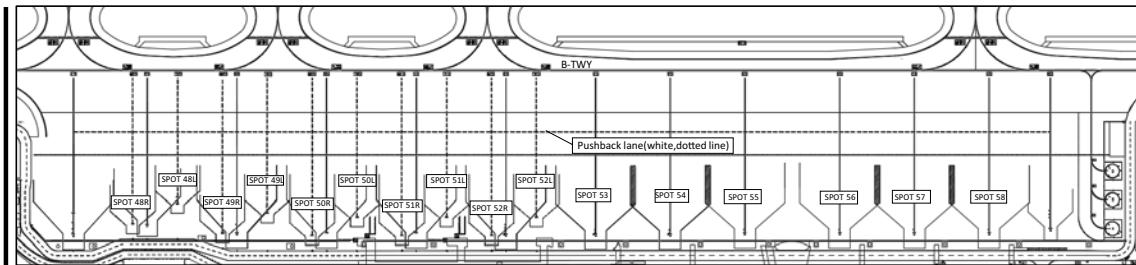

2. Taxiing to and from stands

2.1 Taxiing procedure

- 1) All aircraft are required to hold at "GP HOLD LINE" on TWY A(between E10 and E11) for RWY 34R until receiving further taxi clearance to protect the ILS glide slope signal.
- 2) When ILS approach for RWY34R is in operation, aircraft on the east side of the RWY may need to cross the RWY to protect the ILS glide slope signal. The main taxi routes for crossing the RWY is from E10, C8 to W9.
- 3) In order to keep clearance between aircraft and OBST(42.5m from taxiway center line), all aircraft shall reduce taxiing speed on TWY A(between E5 and E8), B(from W3 to L), Y or K1 and follow the taxiway center line strictly.
- 4) After vacating RWY, aircraft may be instructed to hold short of TWY A in order to separate from aircraft on TWY A. White lines that can be used as a guidance for holding short of TWY A are painted on TWYs E1 through E7.
(See RJFF AD2.24 AD CHART)

2.2 Push back procedures

- 1) Push back from SPOT 1, 1L and 1R should be made to Z unless otherwise instructed by ATC.
- 2) Push back from SPOT 2 to 12R should be made facing to the south due to apron and taxiing restrictions.
- 3) An aircraft at the SPOT other than 1, 1L and 1R might be instructed to make push back to Z if necessary.
e.g. Push back to Z approved RWY16L/34R.
(See RJFF AD2.24 AD CHART)
- 4) Push back from SPOT 48R, 48L, 49R, 49L, 50R, 50L, 51R, 51L, 52R, 52L, 53, 54, 55, 56, 57 and 58 can be made to Pushback lane only for code letter C and below.
Taxiing after push back shall taxi via the nearest lead-in line to TWY B, with reducing engine power to the extent practicable.
Ask AD administration for detail.

**2.3 Safety measures on the TWY**

When taxiing on the TWY K or TWY Y, reduce engine power to the extent practicable.

3. Parking area for small aircraft(General aviation)

Ask AD administration

4. Parking area for helicopters

Ask AD administration

5. Apron - taxiing during winter conditions

Nil

6. Taxiing - limitations

6.1 Wing tip clearance at the TWY intersection (REF. AD1.1.6.8)

Wing tip clearance at the TWY intersection between the aircraft holding at the stop marking on the TWY and the other aircraft taxiing behind it are as follows.

(1) When B744 holding at the stop marking on TWY E1

Wing span(WS) of ACFT taxiing on TWY A	WS < 18.6m	18.6m < WS < 35.6m	WS > 35.6m
Wing tip clearance	A	B	C

(2) When B744 holding at the stop marking on TWY E3

Wing span(WS) of ACFT taxiing on TWY A	WS < 31m	31m < WS < 48m	WS > 48m
Wing tip clearance	A	B	C

(3) When B744 holding at the stop marking on TWY E2, E4, E7, E10, E11, E12

Wing span(WS) of ACFT taxiing on TWY A	WS < 21.2m	WS > 21.2m
Wing tip clearance	B	C

Legend

A : wing tip clearance $\geq 15m$

B : $6.5m \leq \text{wing tip clearance} < 15m$

C : wing tip clearance $< 6.5m$

7. School and training flights - technical test flights - use of runways

Nil

8. Helicopter traffic - limitation

Nil

9. Removal of disabled aircraft from runways

Nil

RJFF AD 2.21 NOISE ABATEMENT PROCEDURES**1. 駆音軽減運航方式**

すべてのジェット機に対して、空港周辺における航空機騒音軽減のため、運航の安全に支障のない範囲で、以下の方式が適用される。ただし、これらの方によることができない航空機は実効的にこれらと同等と認められる代替方式を実施するものとする。

1) 着陸について

急上昇方式

2) 着陸について（滑走路 34L/34R）

ディレイド・フラップ進入方式及び低フラップ角着陸方式

3) リバース・スラストについて

19時以降翌朝7時までの間、着陸機におけるリバース・スラスト使用についてはアイドルまでに制限する。

2. 優先滑走路方式

なし

3. 優先飛行経路

なし

1. Noise Abatement Operating Procedures

For all jet aircraft, in order to reduce aircraft noise in the vicinity of airport, the following procedures shall be applied unless compliance of the procedures adversely affects the safety of aircraft operations. In case that the aircraft is unable to take these procedures, pilots should execute alternative procedures which are considered to be practically equivalent.

1) For take-off

Steepest Climb Procedure

2) For landing to RWY34L/34R

Delayed Flap Approach Procedure and Reduced Flap Setting Procedure

3) Reverse Thrust

Between 1000UTC(1900JST) and 2200UTC(0700JST), pilots are requested to limit the use of reverse thrust to idle reverse after landing.

2. Preferential Runways Procedures

Nil

3. Preferential Routes

Nil

RJFF AD 2.22 FLIGHT PROCEDURES**1. TAKE OFF MINIMA**

	RWY	ACFT CAT	REDL & RCLL		REDL or RCLL or RCL markings		Nil(Daylight only)	
			RVR	VIS	RVR	VIS	RVR	VIS

	16R 34L		-	400m	-	400m	-	500m
Others	16L 34R 16R 34L	AVBL LDG MINIMA						

2. Lost Communication Procedures for Arrival Aircraft under radar navigational guidance

If radio communications with Fukuoka Approach/Radar are lost for 30 seconds, squawk Mode A/3 Code 7600 and:

- (I) 1. Contact Fukuoka tower.
 2. If unable, proceed in accordance with visual flight rules.
 3. If unable, proceed to Fukuoka VORTAC at last assigned altitude or 5000ft whichever is higher, and execute instrument approach.
- (II) Procedures other than above will be issued when situation required.

3. Trajectorized Airport Traffic Data Processing System(TAPS)

福岡アプローチの指示のもとに、当該進入管制区を飛行する航空機は、モード A/3 の二次レーダー個別コード及びモード C による応答を指示される。

二次レーダー個別コードを搭載していない航空機が当該コードによる応答を指示された場合、管制官に対し、その旨通報すること。

Aircraft flying under control of Fukuoka approach control in the approach control area will be instructed to reply with discrete code on Mode A/3 and Mode C.

If an aircraft with non-discrete code capability be instructed to reply with the discrete code, it shall report a controller accordingly.

4. Traffic pattern altitude (Fixed wing ACFT)

- 1) JET.....1,500ft
- 2) PROPELLER
 - Single engine.....800ft
 - Multi engine.....1,000ft
 - (SF34,C130, any type of DH8 and any type of ATR should follow 1,500ft as an exception.)
- 3) MILITARY SMALL JET.....2,000ft

RJFF AD 2.23 ADDITIONAL INFORMATION

Local Flying Restrictions :

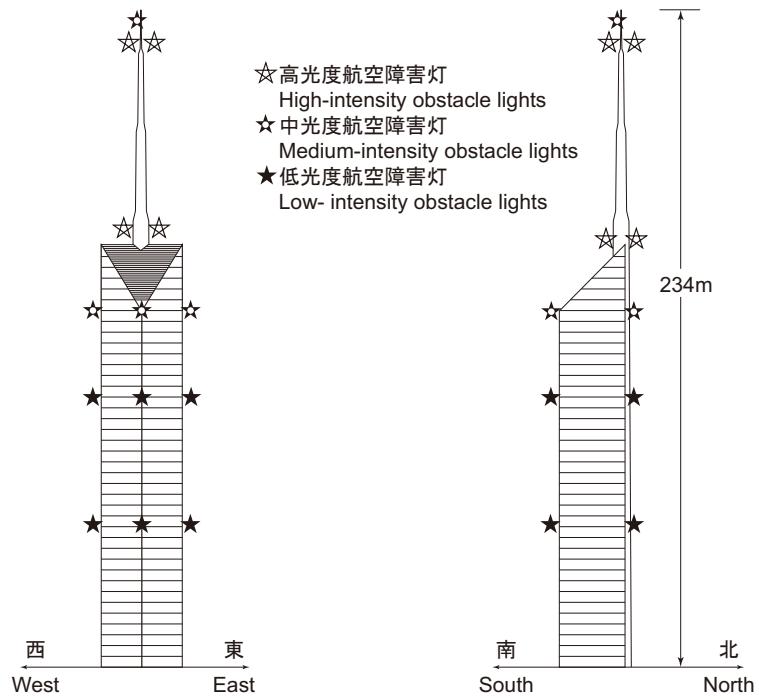

1. BAK-12/15 JET barrier is located at 40m (131ft) outside from RWY34R threshold. BAK-12/15 JET barrier is located at 91m (299ft) outside from RWY16L threshold. BAK-12/15 JET barrier is located at 65m (213ft) outside from RWY34L threshold. BAK-12/15 JET barrier is located at 65m (213ft) outside from RWY16R threshold.
2. ILS
RWY16R, 34L, 16L and 34R ILS radiate simultaneously. Pilot shall confirm type of APCH and using RWY.
3. Helicopter Landing and take off area: located on TWY A, B.(See AD chart)
4. Antenna Tower

アンテナタワー

1. 位置 : 33°35'36"N/130°21'05"E (福岡空港標点から西9.3km)
--- AD2.24 LDG CHART 参照
2. 高さ : 781FT (238M) MSL
768FT (234M) AGL
3. 備考 : 高光度, 中光度及び低光度航空障害灯が付図のとおり設置されている。

Antenna Tower

1. Position : 33°35'36"N/130°21'05"E (9.3km W from FUKUOKA ARP)
--- See AD2.24 LDG CHART
2. Height : 781FT (238M) MSL
768FT (234M) AGL
3. Remarks: High-intensity, medium-intensity and low-intensity obstacle lights are installed on this tower as shown in attached chart.

5. 空港周辺における鳥の密集

春（4月～5月）と秋（9月～10月）に鳥の群れが見られる。

鳥種：ハチクマ

飛翔高度：地上 -3000FT（目視による計測）

特徴：体重 約 800～1500g、大型タカ種

備考：よく晴れた昼間帯において丘陵や海上で発生する上昇気流を利用し、多数のハチクマが旋回して帆翔する現象（タカ柱）が見られる。

空港管理者の対策：空港内でのバードパトロールを実施している。

5. The flocks of birds in the vicinity of the airport

Bird flocks are found in spring (April-May) and autumn (September-October).

Species of birds: Honey Buzzard

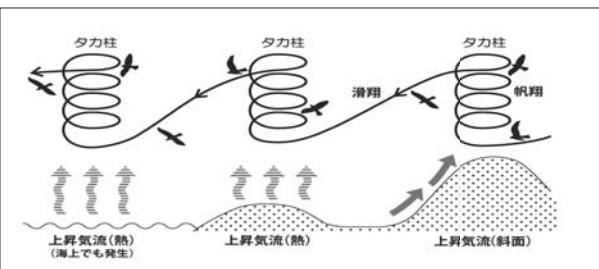

Flying Altitude: GND-APRX 3000FT(visual estimation of bird activities)

Characteristics: Weight 800-1500g, large-sized hawk species

Remarks: Many Honey Buzzards soar using the thermals that occur in the hills and the sea during the sunny daytime.

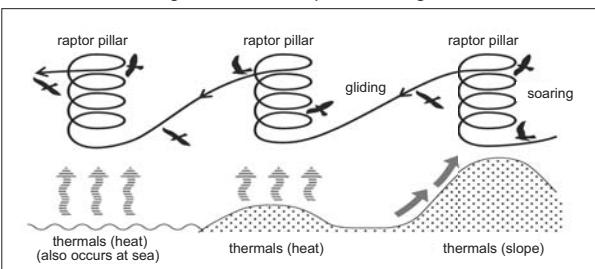

Measure of AD administration: Regular bird patrols are conducted in the airport.
